YOUR CARD, ON YOUR TERMS.

Control where, when, and how your debit card is used with the **MNB Smart Card** app on your smartphone.

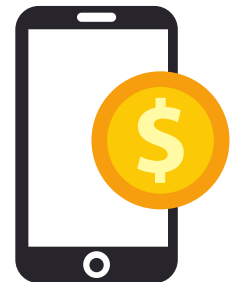

## Security

Turn your cards on or off, in an instant, for any reason

## Control

Control transactions by category or by dollar amounts

## Flexibility

Easily set, customize and modify purchase alerts

# MNB SMART CARD

CONTROL WHERE, WHEN, AND HOW YOUR DEBIT CARD IS USED

## On/off setting

Disable a lost or stolen card instantly. When the card is "on," transactions are allowed in accordance within the set controls. When the card is "off," no purchases or withdrawals are approved until the card is turned back on.

## Location-based alerts and controls

Location controls restrict transactions to merchants located within a certain range of each card holder's location (using the phone's GPS); transactions requested outside of the specified range can be declined.

## Merchant alerts and controls

Transactions can be monitored or controlled for specific purchases such as gas, hotel, travel, restaurants and groceries. Transactions can also be monitored and controlled for specific transaction categories like in-store purchases, e-commerce transactions, mail/phone orders and ATM transactions.

## Usage alerts and controls

Users can establish spending limits to allow transactions up to a certain dollar value and decline transactions when amounts exceed pre-defined thresholds.
